Subject index

Acidic aqueous-organic media
Electrochemical reduction of hexamolybdate (2−) ion in acidic aqueous-organic media (Osakai et al.) 209
Admittance spectra
Tafel current at fractal electrodes. Connection with admittance spectra (Mulder et al.) 103
Ammonia
The nickel electrode in liquid ammonia (Heusler, Kutzmutz) 93
Anthracene
Syntheses and cyclic voltammetry of pyrrole co-polymers substituted by anthraquinone, phenothiazine or anthracene moieties (Andrieux, Audebert) 163
Anthraquinone
Syntheses and cyclic voltammetry of pyrrole co-polymers substituted by anthraquinone, phenothiazine or anthracene moieties (Andrieux, Audebert) 163
Aqueous chloride electrolytes
A study of the electrodeposition of manganese from aqueous chloride electrolytes (Gonsalves, Pletcher) 185

Band electrodes
Transient behavior at planar microelectrodes. A comparison of diffusion current at ring, band and disk electrodes (Cope, Tallman) 85

Carbon monoxide
The characterization of carbon monoxide electrosorbed on ordered rhodium(100) by in-situ infrared spectroscopy (Chang, Weaver) 263
Chloride
A study of the electrodeposition of manganese from aqueous chloride electrolytes (Gonsalves, Pletcher) 185
Chloride solutions
Preconcentration and voltammetric determination of copper ions in aqueous chloride solutions at a crosslinked poly(4-vinylpyridine)-coated electrode (Cassidy, Tokuda) 287
Copper ions
Preconcentration and voltammetric determination of copper ions in aqueous chloride solutions at a crosslinked poly(4-vinylpyridine)-coated electrode (Cassidy, Tokuda) 287
Cysteine derivatives
Some correlations between the structures of cysteine derivatives and the occurrence of a catalytic hydrogen prewave (Bănică et al.) 281

Dc wave
Determination by the Gauss–Newton method of the individual electrochemical parameters from a dc wave overlapping with the discharge of the supporting electrolyte (Bottecchia et al.) 37
4,4′-Dicarboxy ester-2,2′-bipyridine ligands
Polypyridinyl complexes of ruthenium(II) having 4,4′-dicarboxy ester-2,2′-bipyridine ligands attached covalently to polypyrrole films. Reinvestigation of the polypyrrole electro-chemical response in poly[tris(*N*-bipyridylethyl)pyrrole] ruthenium(II) films (Cosnier et al.) 133
Diffusion current
Transient behavior at planar microelectrodes. A comparison of diffusion current at ring, band and disk electrodes (Cope, Tallman) 85
Transient behavior at planar microelectrodes. Diffusion current at the disk electrode by the integral equation method (Cope, Tallman) 79
Transient behavior at planar microelectrodes. Diffusion current at the ring electrode. A comparison of experiment with theory (Kalapathy et al.) 71
Transient behavior at planar microelectrodes.

Diffusion current at ring electrodes by the integral equation method (Cope et al.) 49
Disk electrodes
Transient behavior at planar microelectrodes. A comparison of diffusion current at ring band and disk electrodes (Cope, Tallman) 85Transient behavior at planar microelectrodes. Diffusion current at the disk electrode by the integral equation method (Cope, Tallman) 79
Double layer
Effect of an applied voltage upon electron density profiles. Metal contribution to the differential capacitance (Mola et al.) 25
Electron density profiles
Effect on an applied voltage upon electron density profiles. Metal contribution to the differential capacitance (Mola et al.) 25
Electron transfer
Kinetics of electron transfer mediated oxidations of methyl benzenes by ruthenium(III) tris-bipyridine (Reed, Murray) 149
Equilibrium
Spatially resolved absorption examination of the redox catalysis mechanism: equilibrium and near equilibrium cases (Deputy, McCreery) 1

Fractal electrodes
Tafel current at fractal electrodes. Connection with admittance spectra (Mulder et al.) 103

Gauss–Newton method
Determination by the Gauss–Newton method of the individual electrochemical parameters from a dc wave overlapping with the discharge of the supporting electrolyte (Bottechia et al.) 37
Gold
The stability of hydrous oxide films on gold (Burke, O'Sullivan) 195

Hexamolybdate(2−) ion
Electrochemical reduction of hexamolybdate (2−) ion in acidic aqueous-organic media (Osakai et al.) 209
Homogeneous catalysis
Homogeneous catalysis of electrochemical reactions. "Split waves" at the rotating disc electrode (Compton, Spackman) 273
Hydrogen prewave
Some correlations between the structures of cysteine derivatives and the occurrence of a catalytic hydrogen prewave (Bănică et al.) 281
Hydrous oxide films
The stability of hydrous oxide films on gold (Burke, O'Sullivan) 195

Individual electrochemical parameters
Determination by the Gauss–Newton method of the individual electrochemical parameters from a dc wave overlapping with the discharge of the supporting electrolyte (Bottechia et al.) 37
Integral equation method
Transient behavior at planar microelectrodes. Diffusion current at the disk electrode by the integral equation method (Cope, Tallman) 79
Transient behavior at planar microelectrodes. Diffusion current at ring electrodes by the integral equation method (Cope et al.) 49
Interface of immiscible electrolyte solutions
A photoelectrochemical effect at the interface of immiscible electrolyte solutions (Kotov, Kuzmin) 223

Light scattering
Light scattering from a passivating electrode surface and from an electrode surface subject to pitting corrosion (Kruijt et al.) 17
Low-temperature ion conductivity
Low-temperature ion conductivity of $RbAg_4I_5$ (Pinkowski et al.) 241

Manganese
A study of the electrodeposition of manganese from aqueous chloride electrolytes (Gonsalves, Pletcher) 185
Methyl benzenes
Kinetics of electron transfer mediated oxidations of methyl benzenes by ruthenium(III) tris-bipyridine (Reed, Murray) 149

Nickel
The nickel electrode in liquid ammonia (Heusler, Kutzmutz) 93
Numerical fitting technique
Elements for optimal processing of thin-layer spectroelectrochemical data (Bergel, Comtat) 11

Optimal processing
Elements for optimal processing of thin-layer spectroelectrochemical data (Bergel, Comtat) 11

Passivating electrode surface
Light scattering from a passivating electrode surface and from an electrode surface subject to pitting corrosion (Kruijt et al.) 117
Phenothiazine
Syntheses and cyclic voltammetry of pyrrole co-polymers substituted by anthraquinone, phenothiazine or anthracene moieties (Andrieux, Audebert) 163
Pitting corrosion
Light scattering from a passivating electrode surface and from an electrode surface subject to pitting corrosion (Kruijt et al.) 117
Planar microelectrodes
Transient behavior at planar microelectrodes. A comparison of diffusion current at ring, band and disk electrodes (Cope, Tallman) 85
Transient behavior at planar microelectrodes. Diffusion current at the disk electrode by the integral equation method (Cope, Tallman) 79
Transient behavior at planar microelectrodes. Diffusion current at the ring electrode. A comparison of experiment with theory (Kalapathy et al.) 71
Transient behavior at planar microelectrodes. Diffusion current at ring electrodes by the integral equation method (Cope et al.) 49
Platinum
Structural effects in the electro-oxidation of D-sorbitol on Pt electrodes in acidic medium (Léger et al.) 125
Polypyridinyl
Polypyridinyl complexes of ruthenium(II) having 4,4′-dicarboxy ester-2,2′-bipyridine ligands attached covalently to polypyrrole films. Reinvestigation of the polypyrrole electro-chemical response in poly[tris(*N*-bipyridylethyl)pyrrole] ruthenium(II) films (Cosnier et al.) 133
Polypyrrole
Continuous measurement of the proton generation at an anodically growing polypyrrole layer (Beck, Oberst) 177
Polypyridinyl complexes of ruthenium(II) having 4,4′-dicarboxy ester-2,2′-bipyridine ligands attached covalently to polypyrrole films. Reinvestigation of the polypyrrole electro-chemical response in poly[tris(*N*-bipyridylethyl)pyrrole] ruthenium(II) films (Cosnier et al.) 133
Poly[tris(*N*-bipyridylethyl)pyrrole] ruthenium(II) films
Polypyridinyl complexes of ruthenium(II) having 4,4′-dicarboxy ester-2,2′-bipyridine ligands attached covalently to polypyrrole films. Reinvestigation of the polypyrrole electro-chemical response in poly[tris(*N*-bipyridylethyl)pyrrole] ruthenium(II) films (Cosnier et al.) 133
Poly(4-vinylpyridine)-coated electrode
Preconcentration and voltammetric determination of copper ions in aqueous chloride solutions at a crosslinked poly(4-vinylpyridine)-coated electrode (Cassidy, Tokuda) 287
Proton generation
Continuous measurement of the proton generation at an anodically growing polypyrrole layer (Beck, Oberst) 177
Pyridine
Adsorption of pyridine on the (311) face of silver (Hamelin et al.) 249
Pyrrole co-polymers
Syntheses and cyclic voltammetry of pyrrole co-polymers substituted by anthraquinone, phenothiazine or anthracene moieties (Andrieux, Audebert) 163

Redox catalysis mechanism
Spatially resolved absorption examination of the redox catalysis mechanism: equilibrium and near equilibrium cases (Deputy, McCreery) 1
Rhodium
The characterization of carbon monoxide electrosorbed on ordered rhodium(100) by in-situ infrared spectroscopy (Chang, Weaver) 263
Ring electrodes
Transient behavior at planar microelectrodes. A comparison of diffusion current at ring, band and disk electrodes (Cope, Tallman) 85
Transient behavior at planar microelectrodes. Diffusion current at ring electrodes by the integral equation method (Cope et al.) 49
Transient behavior at planar microelectrodes. Diffusion current at the ring electrode. A comparison of experiment with theory (Kalapathy et al.) 71
Rotating disc electrode
Homogeneous catalysis of electrochemical reactions. "Split waves" at the rotating disc electrodes (Compton, Spackman) 273
Rubidium
Low-temperature ion conductivity of $RbAg_4I_5$ (Pinkowski et al.) 241

Ruthenium
Polypyridinyl complexes of ruthenium(II) having 4,4′-dicarboxy ester-2,2′-bipyridine ligands attached covalently to polypyrrole films. Reinvestigation of the polypyrrole electro-chemical response in poly[tris(*N*-bipyridylethyl)pyrrole] ruthenium(II) films (Cosnier et al.) 133
Ruthenium(III) tris-bipyridine
Kinetics of electron transfer mediated oxidations of methyl benzenes by ruthenium(III) tris-bipyridine (Reed, Murray) 149

Silver
Adsorption of pyridine on the (311) face of silver (Hamelin et al.) 249
D-Sorbitol
Structural effects in the electro-oxidation of D-sorbitol on Pt electrodes in acidic medium (Léger et al.) 125
Spatially resolved absorption spectroelectrochemistry
Spatially resolved absorption examination of the redox catalysis mechanism: equilibrium and near equilibrium cases (Deputy, McCreery) 1
Split waves
Homogeneous catalysis of electrochemical reactions. "Split waves" at the rotating disc electrode (Compton, Spackman) 273
Structural effects
Structural effects in the electro-oxidation of D-sorbitol on Pt electrodes in acidic medium (Léger et al.) 125

Tafel current
Tafel current at fractal electrodes. Connection with admittance spectra (Mulder et al.) 103
Thin-layer spectroelectrochemistry
Elements for optimal processing of thin-layer spectroelectrochemical data (Bergel, Comtat) 11
Transient behaviour
Transient behavior at planar microelectrodes. A comparison of diffusion current at ring band and disk electrodes (Cope, Tallman) 85
Transient behavior at planar microelectrodes. Diffusion current at the disk electrodes by the integral equation method (Cope, Tallman) 79
Transient behavior at planar microelectrodes. Diffusion current at the ring electrode. A comparison of experiment with theory (Kalapathy et al.) 71
Transient behavior at planar microelectrodes. Diffusion current at ring electrodes by the integral equation method (Cope et al.) 49
